## SKILLS

---

C++ | .NET | Java | JavaScript | Typescript | Python | Golang | Node | React | Vue | Redux | jQuery | Angular  
GCP | AWS | Azure | CI/CD | Junit | Mockito | TensorFlow | Gherkin | Cucumber | Lambda | Git | GitHub | OOP  
Atlassian Jira, Confluence, Bitbucket, Align | Rally | Coda | Service Now | Grafana | Elastic Search | TDD, BDD  
Machine Learning | Microservices | Distributed Systems | Frontend | Backend | English, French, Arabic –All professional proficiency or above

## PROJECT EXPERIENCE

---

### Youtuber

[YouTube](#)

01/2014 – Current

- Coach Factory – Agile Coaching, Software Engineering, Atlassian Application setup install configuration, coaching

### Atlassian Trainer / Agile Coach

[Pinterest](#)

11/2018 – 03/2020

- Led the design, development, and deployment of multiple enterprise level microservice applications across a scaled agile Systems teams driving 30 million of revenue using the latest technologies of JAVA and .NET applications deployed to AWS, OpenShift, GitHub and GCP.
- Install Enterprise Product Development (EPD) hierarchy and management strategy using Jira, Structure, Advanced Roadmaps in support of > 3000 users' adoption and agile transformation.

### Atlassian Consultant / Jira Align

[Cigna](#)

11/2018 – 03/2020

- Implement enterprise strategy for using Jira Software and Jira Align and managing adoption from 2K to over 30K new users to a consolidate platform using an alignment strategy enabling effective management of Products, Programs and Projects.
- Team, Program and Portfolio coaching of members towards business value that resulted in reduction of waste, increased efficiency for engineering teams engineering practices and cost savings of 40 million revenue.
- Led the design, development, and adoption of several systems products for teams seeking to onboard software products to provide e2e testing, integration, monitoring with alarm and dashboard integration for real time reporting.

### Atlassian Consultant

[Cox](#)

11/2018 – 03/2020

- Install, Configure, Deploy, Train and Coach over 1100 team members on meaningful use of Atlassian Jira and Confluence and an Agile management strategy for alignment at scale.

- Integrate Jira plugin for testing with product team and provide training and coaching on Behavior Driven Development techniques for Product Owners and Software Developers.
- Coach Engineering teams towards Test Driven Development (TDD) principles to increase code deployment quality by 70% in < 2 years.

#### **Atlassian Agile Coach**

[Hudson Insurance Co.](#)

**11/2014 – 11/2016**

- Create tracking for Product transformation activities and consolidate teams to save > 22 million annually.
- Install shared backlog strategy to enable product management at scale across 80 international agile teams (Scrum and Kanban).
